

# COURSERA CAPSTONE PROJECT:

## *Opening a New Shopping Mall in Casablanca, Morocco*

By Hind TOUFFAH

# BUSINESS PROBLEM

- Location of the shopping malls is one of the most important factors which determine whether the mall will be a success or a failure

- Objective:

Analyzing and defining the best location in the city of Casablanca, Morocco to open a new shopping mall

- Business question:

In the city of Casablanca, Morocco, if a property developer is looking to open a new shopping mall, where would you recommend that they open it?

# DATA

- **Data requirements**

- List of neighborhoods in Casablanca

- Latitude and longitude coordinates of the neighborhoods

- Venue data and data related to shopping malls

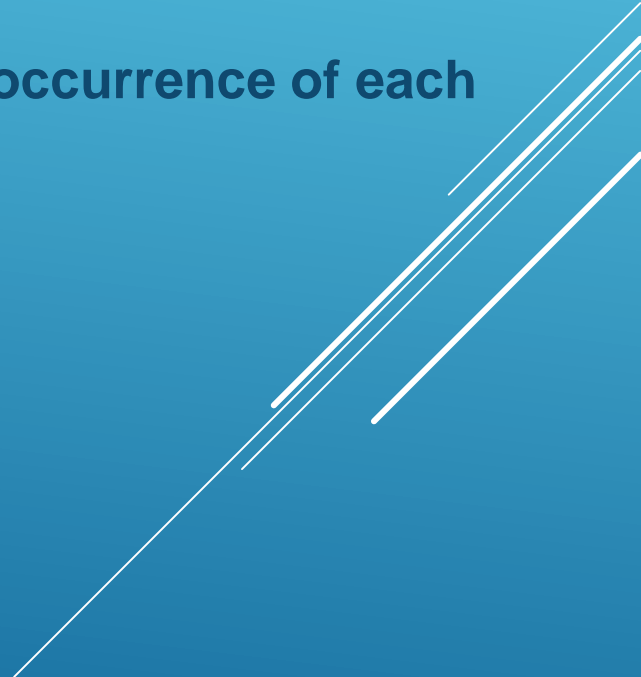

- **Data sources**

- Wikipedia page for neighborhoods

- Geocoder package for latitude and longitude coordinates

- Foursquare API for venue data

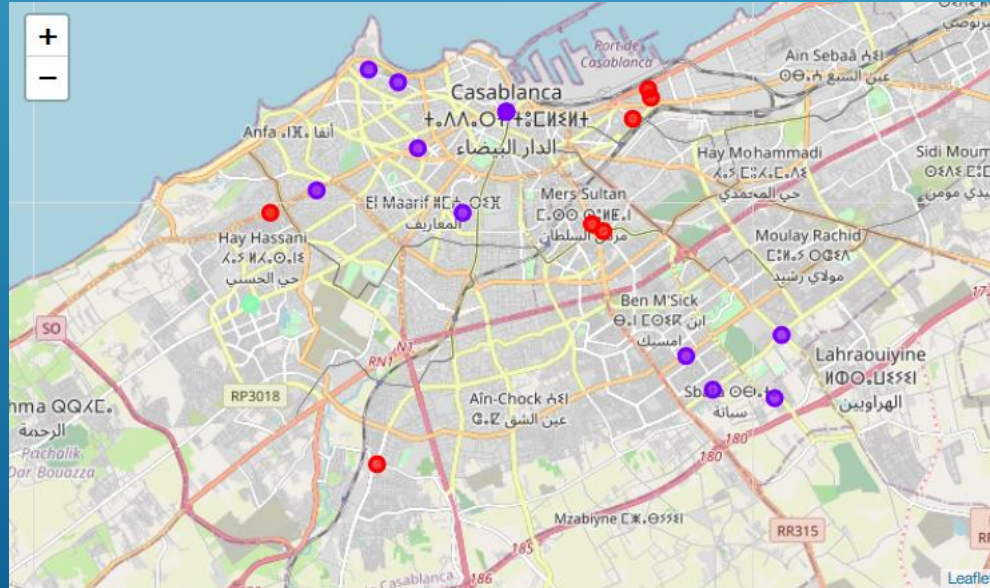

# METHODOLOGY

- Web scraping Wikipedia page for neighborhoods list
  - Get latitude and longitude coordinates using Geocoder
  - Use Foursquare API to get venue data
  - Group data by neighborhood and taking the mean of the frequency of occurrence of each venue category
  - Filter venue category by Shopping Mall
  - Perform clustering on the data by using k-means clustering
  - Visualize the clusters in a map using Folium
- 
- Three white lines of varying lengths and slopes are positioned in the bottom right corner of the slide, creating a modern, abstract graphic element.

# RESULTS

Categorized the neighborhoods into 3 clusters :

- Cluster 0: Neighborhoods with moderate number of shopping malls
- Cluster 1: Neighborhoods with high concentration of shopping malls
- Cluster 2: Neighborhoods with low number to no existence of shopping malls

# DISCUSSION

- Most of the shopping malls are concentrated in the central area of the city
  - Highest number in cluster 1 and moderate number in cluster 0
  - Cluster 2 has very low number to no shopping mall in the neighborhoods
  - Oversupply of shopping malls mostly happened in the central area of the city, with the suburb area still have very few shopping malls
- 
- Three parallel white lines of varying lengths are positioned diagonally in the bottom right corner of the slide, pointing towards the top right.

# RECOMMENDATIONS

- Opening new shopping malls in neighborhoods of cluster 2 with little to no competition
  - Opening in neighborhoods of cluster 0 with moderate competition if having unique selling propositions to stand out from the competition
  - Avoiding neighborhoods of cluster 1, already high concentration of shopping malls and intense competition
- 
- Three parallel white lines of varying lengths are positioned in the bottom right corner of the slide, angled upwards from left to right.

# CONCLUSION

- **Answer to business question: The neighborhoods in cluster 2 are the most preferred locations to open a new shopping mall**
  - **Findings of this project will help the relevant stakeholders to capitalize on the opportunities on high potential locations while avoiding overcrowded areas in their decisions to open a new shopping mall**
- 
- Three parallel white lines of varying lengths are positioned in the bottom right corner of the slide, slanted upwards from left to right.

# THANK YOU
